Magnesite Bonded Fickerts

Super fine green and black silicon carbide Fickerts are with advanced Italian technology to suit for polishing of gress vitrified ceramics.

Premium first quality grains and special magnesite bond system deliver the superior cutting action with unmatched surface clarity and quality.

Polishing oxide bonding system penetrates deep into the stones surface for deeper polishing effect and also works on minimal pressure, ensuring damage free polishing.

Features	Advantages	Benefits
First quality silicon grains	Sharp edges and high purity	Faster cut and longer life at low pressure
Oxide bonding	Deeper polish	Always first quality polish & premium range
Universal holders	Adaptability	Suits for all standard machines

Size and ordering information

Size / Model	Product Range	Pack Size	Availability Size
140 mm & 170 mm	CUMBF - 140	140 mm - 24 nos	EX STOCK
Rough grades	16, 24,36, 46, 60, 80, 120, 150	170 mm - 18nos	
Semi Finish	220, 280, 320, 400, 600		
Super Finish	800, 1000, 1200, 1500		
LUX	Dark & Light Colours		

All dimensions are in mm.

Note : Other sizes and shapes are available on request.
